

Applications similar to the one we are planning to develop:

- CodinGame <https://www.codingame.com/>
- Flexboxfroggy <https://flexboxfroggy.com/>

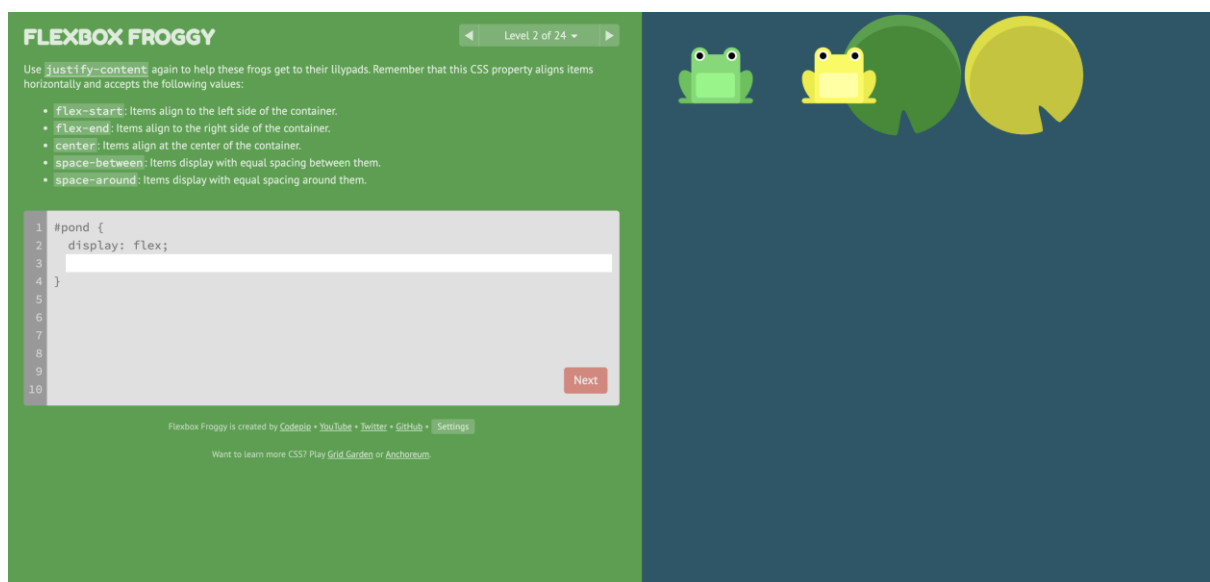

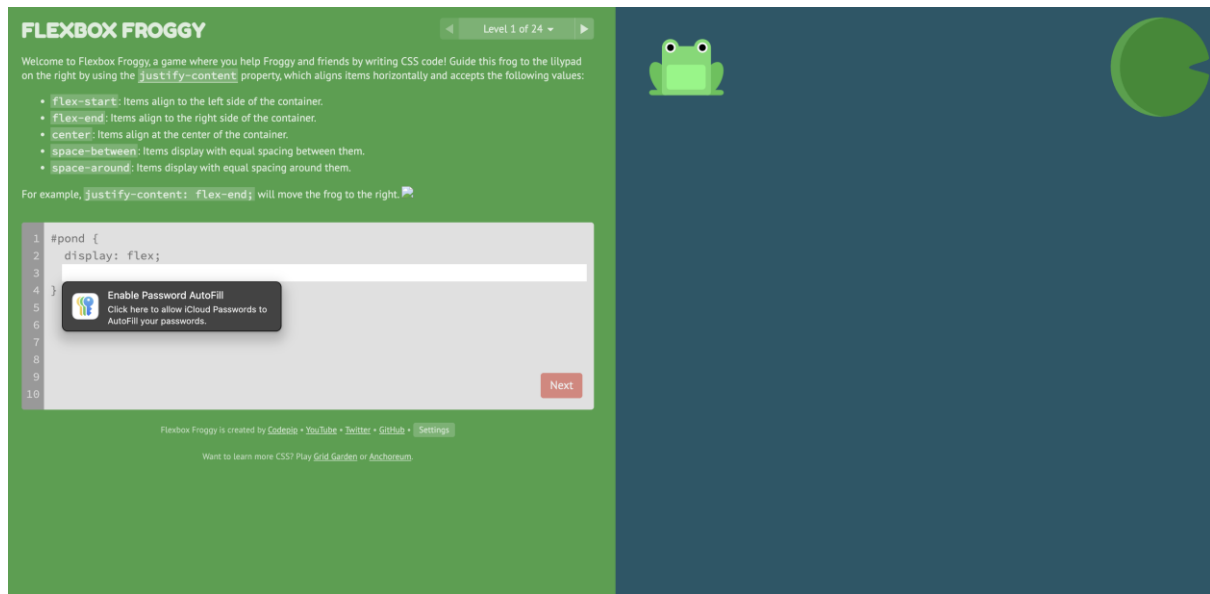

CodinGame

Key Features:

- Users solve puzzles by writing code that controls characters or solves logic problems.
- Real time visual feedback – code written is shown in the live simulation.
- Supports a wide variety of programming languages

FlexBoxFroggy

Key Features:

- Interactive game format – the user writes CSS code to move frogs to their lily pads (Learning by doing)
- Each level builds on the previous one with progressive difficulty
- Clean UI and immediate task which engages the user immediately
